I am MERN stack developer. I am passionate about building web applications and have experience using technologies such as MongoDB, Express, React, Next.js, TypeScript and Node.js. I have completed several projects using the MERN stack, which have helped me develop my skills in full-stack development, database management, and server-side programming. In addition to my technical skills, I am a quick learner and enjoy working collaboratively with other developers to solve complex problems.

EXPERIENCE

2022 - 2023
self Freelancer

FREELANCE FULL MERN STACK DEV

Tasks and overall duties:

- Designed, implemented, and managed a variety of database systems
- Optimized database performance
